

Van Vliet horti

Logistics & Load Carrier Solutions

Van Vliet Verhuur Your one stop shop for comprehensive logistics solutions

Greater efficiency. Deeper insights.
Enhanced innovation. Ensuring every
link in your supply chain is optimized

Proudly leading the way in logistics solutions

With over 25 years of experience, Van Vliet offers a full suite of services under one roof. From our in-house engineering team and dedicated sustainability department to our custom software for footprint calculations and reporting, we have all the expertise needed to optimize your supply chain.

Our centralized facilities in Aalsmeer feature a showroom, service center and advanced production technology, including CNC-robotic machinery and 3D printers. Additionally, our globally operated production facilities enable us to ensure consistent quality and provide dependable support wherever you are.

Comprehensive expertise for seamless logistics

We pride ourselves on being a reliable partner for the world's largest retailers and fastest-growing fulfillment companies. Our holistic approach covers everything from design and development to repair, service and support, ensuring that every aspect of your logistics needs is met with precision and care. Our innovative scan and trace apps further enhance supply chain transparency and efficiency.

Innovative solutions for a sustainable future

Whether you need robust roll containers or innovative logistics solutions, Van Vliet is your partner in making your supply chain more efficient, sustainable and future-proof. Join us on the journey to logistical excellence and a greener future.

A tradition of quality, empowered by innovation

At Van Vliet, we are known for our trusted range of roll containers that have set the standard in the logistics industry for decades. But we don't stop there. Our commitment to innovation means we are constantly exploring new developments to meet the evolving needs of our customers. Whether it's creating modular designs for enhanced flexibility or integrating smart technology for improved tracking and efficiency. We go beyond the traditional to offer solutions that keep you ahead of the curve.

Expert and innovative in load carriers

Innovative concepts require equally advanced load carriers and logistics solutions. We collaborate closely, designing, testing and producing tailored solutions. With Van Vliet, you gain 25 years of expertise in load carriers and logistics. We are committed to innovation, quality, and transparency. Our comprehensive range of services ensures customized solutions that meet your unique needs.

Benefits of partnering with Van Vliet:

- **Quality:** Over 25 years of experience
- **Innovation:** In-house R&D department
- **Transparency:** Real-time visibility into your transactions
- **Comprehensive service package:**
 - End-to-end solutions for all your needs
- **Customization:** Tailored solutions to meet specific requirements
- **Proven reliability:** A trusted partner for consistent performance and support

Pioneers in smart packaging

Newwen is a pioneer in reusable packaging materials integrated with IoT technology, setting the standard for innovation in the industry. As the first company to combine these advancements, we have established ourselves as the expert in supply chain solutions for large e-commerce businesses.

Your customised **solutions** proces

Our integrated approach: a true one-stop shop

At Newwen, we manage every aspect of your project in-house, ensuring seamless coordination and superior quality. From initial requirement interviews and supply chain analysis to R&D, prototyping, production and after-sales services, we provide end-to-end solutions as your one-stop-shop. This integrated approach allows us to deliver customized, innovative logistics solutions that meet your unique needs, while maintaining the highest standards of efficiency and transparency.

CO2 reduction

The VVR retail load carriers are becoming a more familiar sight in Europe and have already been adopted by several large retailers as the new standard for the distribution and display of their flowers and plants. Currently used in many countries in thousands of supermarkets. Some reasons why retailers choose to use the VVR system are:

Official LCA study and report proof that this VVR system provides a 67%>70% CO2 reduction, 77%>80% CED reduction and 69%>71% H2O reduction*. 1.000 units save Carbon reduction equivalent of 249.071 km drive (Ford Fiesta 1.0 ecoboost), saves 335.050 liters of water and saves a yearly energy use of 22 households!

(*compared to CC/DC Trolley systems)

These VVR items can be cleaned or disinfected. Compared to traditional wood in Danish containers and shelves, dangerous bacteria and molds can be nested in the wood cells. Currently used wood items cannot be cleaned or disinfected in a easy way.

Compared to Danish Containers/shelves no Phenol- and Formaldehyde chemicals are used! **This can be 100% recycled, it does not need to be burned at the end of the life cycle like Danish shelves and CC/DC container bases.**

East to disassemble, stack for return transports or storage. All bases have **RFID technology** which can be used for automated registration. No additional packing needed to avoid plant material like soil and waste material getting on your supermarket floor due to the **closed concept**. All Euro norm size based. Special accessories available, like flower bucket shelves, special wreath shelves, anti frost covers, watering sheets, efficient plant trays, safety stacking tools (DEKRA certified).

Available in 3 height variants, posts of 1.150 mm (to stack 2 sets), 1.450 mm and 1.800 mm. Ground size 610 mm x 810 mm. Other post sizes can be custom made.

Base and posts are stainless steel, steel parts of the casters and shelves are high quality electrical galvanized. Salt spray laboratory tests show no dark rust after 272 hours for shelves steel parts and 336 hours for the casters.

Independent laboratory test show that the VVR system can withstand extreme pressure and weights, up to 5 to 10 times of the current DC/CC RTI systems.

- **Cost per turn is >50% lower** than common plant distribution in cardboard boxes on pallets.
- **Sales and rental versions** available
- **High quality and visually highly attractive** for consumer stores
- **Posts cannot be exchanged** with other RTI concepts to prevent fraud
- Protected by **intellectual property**
- Standard EURO size measurements (1/2 EU pallet size) is more convenient for retail supply chains
- Constant innovation and development for new accessories for the VR system make it more and more suitable for all supply chains

Explore the possibilities for your supply chain, see what benefits it can bring? Setting up a testcase for your supply chain can be arranged to proof the satisfying benefits. Contact our NEWWEN account team for more information or plan a visit to our new Experience Center in Aalsmeer.

BAKERY TROLLEY PP WHEEL

Art. 10.9010

BAKERY TROLLEY TPR WHEEL

Art. 10.9011

BEER TABLE TROLLEY

Art. 10.8020

- Size: 2290x580 mm
- Weight: 34kg

BAKERY BOX

Art. 07-2001-5040

- PP Corrugated sheet
- 0-30% recycle material
- Any color available

Our integrated approach a true one stop shop

At Newwen, we manage every aspect of your project in-house, ensuring seamless coordination and superior quality.

From initial requirement interviews and supply chain analysis to R&D, prototyping, production, and after-sales services, we provide end-to-end solutions as your one-stop-shop.

This integrated approach allows us to deliver customized, innovative logistics solutions that meet your unique needs, while maintaining the highest standards of efficiency and transparency.

Discover Newwen

As your partner in custom trolleys and logistics innovation, Newwen is committed to the power of customization, innovation and collaboration. We are a leading specialist in custom trolleys and offer smart logistics solutions that help drive your business forward.

Our trolleys are designed with a future-oriented approach, utilizing the latest technologies, including IoT integration, to provide real-time insights and control. Whether it's optimizing last-mile distribution or increasing logistical efficiency, Newwen is here for you.

With a team of experienced experts, we combine technical know-how with a fresh perspective on the future. As your partner, we work with you from concept to realization, aiming to improve your processes and enhance your competitive edge.

What sets us apart?

Our focus on quality, innovation and customer-centricity. We listen to your needs, analyze your requirements and translate them into efficient, sustainable and user-friendly solutions.

With Newwen as your partner, you gain not only technological expertise but also a dedicated and reliable advisor.

Produce boxes multi-use

Multi-use solutions have a lower CO2 impact up to 81% compared with single use

73.04 kg
CO2 eq*
(single use)

16.52 kg
CO2 eq*
(multi use)

* Impact category: Climate change * Method: EF 3.0 Method (Ecoinvent v 3.8 Cut-Of)

PRODUCE BOX 4 KG

Art. 04.1004.SP

- Size: 330 x 270 x 105 mm

PRODUCE BOX 8 KG

Art. 04.8004.SP

- Size: 400 x 300 x 150 mm
- PP Corrugated sheet
- 0-30% recycle material
- Any color available
- Optional RFID label

PRODUCE BOX AVO

Art. 04.1050.S040

- Size: 400 x 300 x 100 mm
- PP Corrugated sheet
- 0-30% recycle material
- Any color available
- Optional RFID label

PRODUCE BOX PEP

Art. 04.1010.S030

- Size: 500 x 300 x 160 mm
- PP Corrugated sheet
- 0-30% recycle material
- Any color available
- Optional RFID label

BANANA BOX 18 KG

Art. 04.1010.V040

- Size: 498 x 398 x 240 mm
- PP Corrugated sheet
- 0-30% recycle material
- Any color available
- Optional RFID label

Horti culture boxes multi-use

519 BOX LID

Art. 02.2519.V040

519 BOX BOTTOM

Art. 01.2519.V040

- Standard & custom
- PP Corrugated sheet
- 0-30% recycle material
- Any color available
- Optional RFID label

CNT BOX LID

Art. 02.1002.V030

CNT BOX BOTTOM

Art. 01.1002.V040

- Standard & custom
- PP Corrugated sheet
- 0-30% recycle material
- Any color available
- Optional RFID label

- Any color available
- Optional RFID label

1/1 DANISH TROLLEY SHELF BOX BOTTOM

Art. 01.2100.V040

- Standard & custom
- Ultrasonic welded
- PP Corrugated sheet
- 0-30% recycle material
- Any color available
- Optional RFID label

1/2 DANISH TROLLEY SHELF BOX LID

Art. 02.2050.V030

- Standard & custom
- Ultra sonic welded
- PP Corrugated sheet
- 0-30% recycle material
- Any color available
- Optional RFID label

1/2 DANISH TROLLEY SHELF BOX BOTTOM

Art. 01.2052.S040

- Standard & custom
- Ultrasonic welded
- PP Corrugated sheet
- 0-30% recycle material
- Any color available
- Optional RFID label

DANISH TROLLEY COLLAR

Art. 03.1000.S040

- Standard & custom
- PP Corrugated sheet
- 0-30% recycle material
- Any color available
- Optional RFID label

EURO boxes multi-use

EURO BOX 28

Art. 09.1028.V035

EURO BOX 38

Art. 09.1038.V035

EURO BOX 48

Art. 09.1048.V035

EURO BOX 58

Art. 09.1058.V035

EURO BOX 78

Art. 09.1078.V035

- Standard & custom
- Ultrasonic welded
- PP Corrugated sheet
- 0-30% recycle material
- Any color available
- Optional RFID label
- FEFCO 0201 available

PALLET SHEET 3MM

Art. 07.1000.S030

PALLET SHEET 5MM

Art. 07.1000.S050

- Standard & custom
- Size 780 x 1180 mm
- PP Corrugated sheet
- 0-30% recycle material
- Any color available
- Optional RFID label

Real-time insights, tracking and advanced connectivity

In a world where speed and efficiency are paramount, Newwen offers the future of smart logistics. By leveraging Internet of Things technology (IoT), we bring boxes, crates and trolleys to life with real-time insights, tracking and advanced connectivity.

Imagine a logistics process that is constantly optimized through real-time data. Our IoT solutions make this a reality. From tracking the location of a trolley to monitoring the contents of a box – everything becomes visible, controllable and predictable. This leads to shorter lead times, fewer errors and greater flexibility within your supply chain.

Why choose Newwen?

We are not just a supplier, but your partner in innovation. We develop smart solutions that seamlessly integrate with your business processes and are fully customized to your needs. Together with you, we build a future where your logistics become smarter, faster and more sustainable.

Discover how our IoT-integrated boxes, crates and trolleys can boost your logistics efficiency.
Newwen – Together, we make logistics smarter.

Partnering on custom solutions for lasting impact

At Newwen, we pride ourselves on partnering with forward-thinking companies to create custom, innovative solutions that enhance every aspect of their logistics processes. Our collaboration with Picnic, one of the fastest-growing online supermarket chains in Europe, is a prime example of our hands-on, tailored approach to supply chain optimization.

Michel Muller, CEO of Picnic shares his experience:

"Newwen is a true hands-on partner, working effectively together during our research and development process. The racks are specifically designed to meet the needs of all the steps in our supply chain. Increasing the productivity of our staff, electric vehicles, hubs, and fulfilment centers with enhanced solutions for our racking system."
